## Gomaco Corporation

**Location:** Ida Grove, Iowa USA

**Industry:** Construction

**Product:** KLEEN KOTE

### Background:

Gomaco Corporation is the worldwide leader in concrete paving technology. Manufacturing curb and gutter machines, slipform pavers, placer/spreaders, trimmer/placers, cylinder finishers, canal machinery and accessories, Gomaco Corporation has distribution throughout the world and focuses on providing added value to their customers by promoting the use of KLEEN KOTE to protect their machinery while in the construction field. Stickage and buildup of concrete is a continual concern for machine operators and construction companies whose time and money are of the most importance.

### Use:

Gomaco Corporation wanted to find a way to extend the life and reliability of their machinery for their customer. KLEEN KOTE is the perfect solution. Gomaco found that when customers spray their machines with KLEEN KOTE, they protect the machine from stickage and buildup of concrete allowing the customer to use the machine for longer durations between cleanings. It also allows the machine operator to spray the machinery the night before after power washing it clean and while the machine is still wet, creating even less downtime and greater protection.

### Results:

- **Decrease in machine downtime** – Customers did not have to start and stop in the middle of the project to clean the machine or remove buildup. The Machine operator didn't have to wait for the machine to dry before prepping for the next day.
- **Protective** – Created a protective barrier that prevented buildup and stickage on the entire machine including protection of controls, wiring and electrical apparatus. Kept the machines cleaner longer.
- **Easy to use** – The Machine operators mixed KLEEN KOTE with water and sprayed on the machines the night before, readying the machines for use in advance.
- **Extended Equipment Life** – KLEEN KOTE protected the machinery during operation and in storage, protecting against long-term damage caused by use and the environment.
- **Innovative** – A first of its kind, KLEEN KOTE is a water-based release agent that prevented stickage and buildup during use and continued to protect the machine when it was not in use by preventing corrosion.
- **Environmentally & user friendly** – Machine operators and other employees did not need special equipment or clothing to handle, apply or remove KLEEN KOTE.

Progressive Solutions' customers such as Gomaco have always been able to rely on our expedited service and high quality products for more than a decade and continue to strive for excellence today. With 13 years of partnered success, Gomaco and KLEEN KOTE have provided Gomaco's customers with the ability to reduce time and costs on their jobs, and increasing the life and reliability of the machinery.
